

AT OUR MEMBERS' SERVICE

FUNDING PROGRAMS

- Inter-center initiatives
- National and international initiatives
- Prize awarded for presenting at a science-based events in Quebec
- Funding to cover the expenses of out-of-province invited speakers
- Young scientist award

TRAINING

- Training camp for our student members
- Institut de cardiométabolisme et de nutrition Conference Series (Paris)

SCIENTIFIC EVENTS

- Scientific exchanges week destined to researchers and health care professional members
- International Conference on Abdominal Obesity/CMDO Network's partner

THE NETWORK'S ACTIVITIES

- Clinical research project posting/Recruitment
- Interactive research networking tool
- Posting of information related to provincial or international scientific events, employment/academic offers for professionals and students and resources for scientists

Over 750 members

THE CMDO NETWORK'S STRATEGIC OBJECTIVES

WHO WE ARE?

We are one of the most recent theme networks funded by the Fonds de recherche Québec en santé. Our network brings together more than 120 research teams working across more than 30 institutions in Quebec.

MISSION

The CMDO Network's mission is to conduct research on cardiometabolic health, diabetes and obesity, widely diffuse its results and ensure the findings are used to promote the health and quality of life of Quebec citizens.

To promote, establish and strengthen **collaborations** between the teams involved in the network's three research themes through meetings and scientific exchanges.

To facilitate the establishment of **international partnerships**.

To prioritize **training** for the new generation of scientists.

To increase Quebec's capacity to recruit and retain successful researchers.

To ensure that members have timely **access** to specialized platforms and communal services.

To promote the **transfer of knowledge**.

This network funds projects considered most relevant not only to our member researchers, but also to the patients suffering from cardiometabolic illnesses, research institutions, and our partners. Another guiding principle of this network is the convergence of its objectives and investments across multiple levels permitting the network to support projects with high potential for scientific impact. Finally, the network aims to establish international partnerships attracting scientific collaborations, technological transfers, as well as investments from outside of Quebec.

HARNESSING OUR NETWORK'S STRENGTH

We aim to bring together previously unconnected, leading-edge scientific and clinical experts, provide solid support for existing and future infrastructure, and develop large, multicentre patient cohorts. Consequently, the CMDO network meets the criteria of the Ministry of Health and Social Services' Policy for health and well-being.
