L'insuline: une hormone aux multiples cibles tissulaires

- **Thursday, June 10, 2021, 12PM-2PM**
- Host: Dr. Andre Marette (CRIUCPQ-UL)
- To register (**French webinar**) - [Click HERE](#)

This year marks the 100th anniversary of the discovery of insulin, a hormone that performs a variety of physiological functions important for the management of energy metabolism and many other biological systems. Inadequate secretion or resistance to the physiological effects of the hormone contribute to the development of diabetes. In this webinar, we will discuss the different sites of action of insulin, and review the mechanisms involved in the pathophysiology of insulin in the metabolic syndrome.

Dr Mathieu Laplante, PhD

The actions of insulin on adipose tissue and the liver

Professor, Laval University
Researcher, CRIUCPQ

Dr Alexandre Caron, PhD
How does the brain control the effects of insulin?

Professor, Laval University
Researcher, CRIUCPQ

Dr Mathieu Ferron, PhD

Bone...an unexpected target of insulin

Professor, University of Montreal
Researcher, IRCM

Dr Fernando Anhe, PhD
Regulation of insulin by gut microbes
Postdoctoral Fellow, McMaster University
McMaster, Ontario

A journey from 1921 to today!

A series of 4 webinars that will take you from the historical discovery of insulin to its therapeutic application

30-minute presentations (interview format with our experts)
followed by a panel discussion with the audience

L'histoire de l'insuline et du rôle du pancréas dans le diabète

- **Thursday, May 13, 2021, 11AM-1PM** – Host: Dr. Andre Carpentier (CRCHUS)
- **Speakers:** Dr. Marc Prentki (CRCHUM), Dr. Vincent Poitout (CRCHUM) and Dr. Anne-Marie Carreau (CRCHU de Quebec-UL)
- To register (**French webinar**) - [Click HERE](#)

Type 1 diabetes: the miracle of insulin and the perspectives of a cure

- **Thursday, May 20, 2021, 12PM-2PM** – Host: Dr. Sylvie Lesage (UMontreal)
- **Speakers:** Dr. James Shapiro (UAlberta), Dr. Constantin Polychronakos (McGill), Dr. Jayne Danska (UToronto) and Dr. Erin Hillhouse (PeriPharm Inc)
- To register (**English webinar**) - [Click HERE](#)

Maladies métaboliques et diabète de type 2

- **Thursday, May 27, 2021, 12PM-2PM** - Host: Dr. Catherine Mounier (UQAM)
- **Speakers:** Dr. Jean-Pierre Despres (VITAM, CIUSSSCN), Dr. Karine Clement (ICAN, Paris) and Dr. Andre Tchernof (CRIUCPQ-UL)
- To register (**French webinar**) - [Click HERE](#)

L'insuline: une hormone aux multiples cibles tissulaires

- **Thursday, June 10, 2021, 12PM-2PM** - Host: Dr. Andre Marette (CRIUCPQ-UL)
- **Speakers:** Dr Mathieu Laplante (CRIUCPQ-UL), Dr Alexandre Caron (CRIUCPQ-UL), Dr Mathieu Ferron (IRCM) and Dr Fernando Anhe (UMcMaster)

100 years ago, Banting, Best, McLeod and Collip discovered and purified insulin, the greatest medical discovery in Canadian history. Insulin quickly saved hundreds of thousands of patients around the world. This first webinar will describe the history of diabetes, the discovery of insulin and the successive advances in the functioning of the endocrine pancreas, allowing for the current treatment of all forms of diabetes.

Dr Marc Prentki, PhD

The history of diabetes until the discovery of insulin

Professor, University of Montreal
Researcher, CRCHUM

Dre Anne-Marie Carreau, MD

Medical treatments for diabetes

Professor, Laval University
Researcher, CRCHU of Quebec

Dr Vincent Poitout, PhD

Scientific progress after the discovery of insulin

Professor, Université de Montréal
Researcher, CRCHUM

Type 1 diabetes: the miracle of insulin and the perspectives of a cure

- **Thursday, May 20, 2021, 12PM-2PM**
- Host: Dr. Sylvie Lesage (UMontreal)
- To register (English webinar) - [Click HERE](#)

100 years ago, insulin was discovered in Canada. For type 1 diabetes, it was a miracle drug; it allowed type 1 diabetic patients from all around the world to ... survive!

Type 1 diabetes is an autoimmune disorder, where immune cells destroy insulin-producing cells, and for which insulin administration remains the primary treatment to allow individuals to live with diabetes.

To celebrate the 100th anniversary of the life-changing discovery of insulin, we will hear from Canadian experts. They will describe the impact of discovery of insulin and their vision of how advancements in research will lead to a type 1 diabetes-free world.

Dr. Jayne Danska, PhD

Sex and microbes to understand and cure T1D

Tanenbaum Chair in Molecular Medicine and Senior Scientist
Hospital for Sick Children
Professor, Depts of Immunology, and Medical Biophysics
University of Toronto, Toronto, Ontario

Dr. James Shapiro, MD

Islet transplantation to cure T1D

Canada Research Chair in Transplant Surgery and Regenerative Medicine
Professor of Surgery, University of Alberta

Dr. Constantin Polychronakos, MD

Genetics to predict and cure T1D

Professor, Department of Pediatrics, Division of Endocrinology
McGill University

Dr. Erin Hillhouse, PhD

Living with T1D in the hopes of an integrative cure

Manager, Health Economics and Outcomes Research,
PeriPharm Inc

One hundred years ago, insulin was discovered by our Toronto colleague Frederick Banting, making it possible to treat diabetes and thus save the lives of many patients. However, even if insulin made it possible to consider a therapy for diabetes, it could not always improve the lives of patients.

Indeed, in particular conditions such as obesity or unbalanced gut microbiota, the body no longer responds adequately to insulin. Recent research on both the treatment of obesity and the link between the gut microbiota and insulin response allows us to consider new strategies for the treatment of type 2 diabetes and the restoration of an adequate insulin response.

Dre Karine Clément, MD, PhD

The role of the gut microbiota in insulin resistance

Professor, Sorbonne University - INSERM, Faculty of Medicine
Director of the Nutrition and Obesity Unit; systemic approaches
Pitié-Salpêtrière Hospital, Paris, France

Dr Jean-Pierre Després, PhD

The different types of obesity and their impact on quality of life

Professor, Laval University
Researcher - Vitam - Centre de recherche en santé durable
Scientific Director - Centre intégré universitaire de santé et de
services sociaux de la Capitale-Nationale

Dr André Tchernof, PhD

Bariatric surgery as a treatment for restoration of insulin response

Professor, Laval University
Researcher, CRIUCPQ
